

OI-6940-ST

Notis Quad Sensor Assembly Stand

The Otis Instruments, Inc. OI-6940-ST is a two-wheel stand engineered specifically for use with the OI-6940 Notis Quad Sensor Assembly.*

The unique hand cart design of the OI-6940-ST enables the robust OI-6940 sensor assembly to be easily transported while in the field. Pre-mounting of the OI-6940 sensor assembly onto the stand eliminates the need for on-site mounting. Simply place the battery-powered WireFree OI-6940 sensor assembly and stand in the desired location and power on the device.

FEATURES AND BENEFITS

- Two-wheel hand cart design allows the 23 lb. OI-6940 sensor assembly to be pushed or pulled, not carried
- Eliminates the need for placement in an area with a pre-existing structure strong enough to support the OI-6940 sensor assembly
- No mounting tools or hardware necessary for setting up the mounted OI-6940 sensor assembly on location
- Pre-mounting the battery-powered WireFree OI-6940 sensor assembly reduces installation and setup time while in the field
- Stackable design for compact storage of pre-mounted OI-6940 sensor assemblies

**Sensor assembly sold separately*

OI-6940-ST Stand

GENERAL SPECIFICATIONS

Maximum Load	100 lbs.
Dimensions	1'- 7 1/8" L x 1'- 3 1/2" W x 3'- 4 1/2" H
Warranty	30 days

REPLACEMENT PARTS

Wheel Replacement Kit*	OI-6940-ST-WK
------------------------	---------------

*Wheel Replacement Kit contains one OI-6940-ST wheel with washer, cotter pin, and locknut
