Subject: Mandatory upgrade required on PosiChek3 parallel port test bench machines still in use

Dear Customer,

This technical bulletin serves notice that all older PosiChek3 (Posi3) non USB test bench machines need to be upgraded to the USB connection platform by January 1, 2017. Upgrades to USB connection will no longer be available past the January 1, 2017 date.

Upgrade Kit part numbers 54-21-09 and 54-21-10 will no longer be available for purchase by PosiChek service centers after January 1, 2017.

Please contact your regional PosiChek service center to schedule this mandatory upgrade.

Along with the discontinuation of the PosiChek USB upgrades, the following 32-bit OEM software versions for parallel port PosiChek test bench machines will be discontinued. These part numbers are:

| | |
|------------|------------------|
| 54-22-69-L | Survivair |
| 54-22-65-L | MSA |
| 54-22-58-L | Draeger |
| 54-22-62-L | Interspiro |
| 54-22-64-L | Avon/ISI |
| 54-22-66-L | Standard/Generic |

Yours sincerely,
Steve Bowman, Director PosiChek
